May 10, 2004, San Rafael, California—Solidifying its fan commercialization process, PAX Scientific today announced the awarding of two master licenses: one to PaxIT LLC, which will market computer cooling applications, and one to PaxFan LLC, which will handle commercial, domestic, and industrial fan products.

Both firms are headed by entrepreneur and author Paul Hawken. Hawken has founded several companies, including Smith and Hawken, Datafusion, and Groxis. Hawken is a member of the PAX Scientific Advisory Board.

“We are delighted to be working with Paul in this capacity,” said Jay Harman, PAX CEO. He continued, “Paul’s business insights and acumen will be a valuable asset in helping PAX technology reach client companies in the areas of electronic thermal cooling and fan manufacture.”

Both PaxIT and PaxFan are headquartered in Sausalito. The companies are currently in negotiation on their first sub-licenses.

PAX Scientific is an industrial design firm that employs a fundamental scientific discovery, called the PAX Streamlining Principle, to translate natural flow efficiencies into streamlined geometries. The company then uses these geometries to create designs that significantly improve the performance, output, and energy usage of a wide range of industrial and domestic equipment. PAX licenses its patented designs to manufacturers.
