

PAX SCIENTIFIC TO NEW LOCATION

September 6, 2003, San Rafael, California—PAX Scientific announced its move to new and larger offices in the downtown area. Relocating a mere two blocks from the company's previous location, PAX is taking over former law offices at 1615 Fifth Avenue in San Rafael.

Business offices:

1615 Fifth Avenue

San Rafael, CA 94901

USA

T: 415-256-9900

F: 415-256-9901

P.O. Box 128

South Fremantle, WA 6162

Australia

The two-story glass and brick building, which has twelve separate offices and a conference room, also includes a kitchen, deck, and two parking lots.

"This move accurately reflects the company's recent growth," stated Francesca Bertone, PAX's Chief Operating Officer. She continued, "Not only is there more office space for staff we have recently added—and for those we anticipate hiring in the next 6 to 8 months—but the building provides dedicated rooms for our design laboratories and test equipment."

PAX EVP Slim Shekar concurs: "As our commercialization efforts meet with increasing success, we require an environment that is welcoming for clients."

Due to the short distance of the move, the company will retain its original phone and fax numbers.

PAX Scientific is an industrial design firm that employs a fundamental scientific discovery, called the PAX Streamlining Principle, to translate natural flow efficiencies into streamlined geometries. The company then uses these geometries to create designs that significantly improve the performance, output, and energy usage of a wide range of industrial and domestic equipment. PAX licenses its patented designs to manufacturers.
